APPROVAL OF ENROLLMENT FORM

APPROVAL

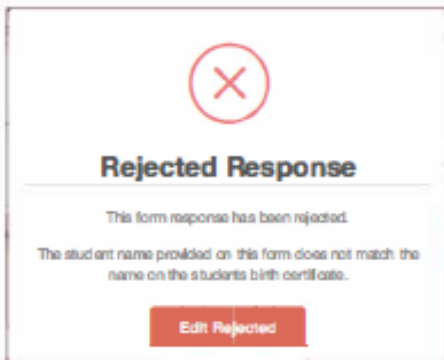

A form may be set up to require a school or district administrator to verify the information in a form when it is submitted. When that is the case, the form will go into a pending state until the administrator approves or rejects the submission. A pop-up window will open on submission, informing you the form is pending approval.

The form will have a yellow background and edited fields that need approval will have a red flag beside them. Hovering over the flag will show the current and previous response for that field. On the Ecollect Forms page, a pending form will have the status of  Pending and the row will be highlighted yellow.

If the form is approved, the status will be  Approved and the form background return to white.

If the response to the form was rejected, the form will be highlighted red in the form list and the status will be  Rejected. Clicking the form name will display the form with a red background. A pop-up window will open, letting you know the form was rejected. If the administrator indicated a reason the form was rejected, that reason will also display on the pop-up.

Click the Edit Rejected button to be able to edit your submission. Once you finish making your changes, resubmit the form. It will return to pending status.

If the form is set up to send parent notifications and you have enabled them on your account, you will receive an email when a form's status moves from Pending to Approved or Rejected.
